PROJECT

1. RBL (Research Based Learning)

Title: The Impact of Remote Work on Team Collaboration and Communication

(The research captures experiences during a specific period, potentially overlooking long-term effects of remote work on team dynamics and productivity)

2. SQL Schema

Title UPI System Analytics Using SQL

This project uses SQL to analyze the UPI ecosystem by examining user behavior, transaction patterns, and payment method usage. It applies relational database design and analytical queries to generate insights for decision-making, risk assessment, and customer segmentation in digital finance.
